Work Experience

Freelance Software Developer, CaptureTech, Nieuw-Venep

December 2020 — April 2021

Police tender. A distributed management system (cloud and local cabinet) for electronic cabinets, where items such as bodycam, laptops, pepper spray, baton etc.. can be stored. The challenge was mainly in the connection and synchronization between the local systems and the cloud database with SignalR. My contribution was Fullstack: worked on both the REST API and UI projects.

Worked with: C#, NET Core, REST API, SQL server, PostgreSQL, Javascript, CSS, Azure DevOps, Docker, GIT, Vue.js, Vuex, EntityFramework, MediatR, SignalR, UnitTest, Azure Functions, Keyvault

Freelance Software Developer, QizMe, Amsterdam

March 2020 — September 2020

Continuation of the QizMe dating platform. This time more focus on front end tasks: development of the React Native app. Further development of the WEB-API. Social media login. Storage and management of graphical content. Think along with the business regarding the flow of the application. Maintenance of the website. Added the gaming-mode to the app and the WEB-API.

Worked with: C#, NET Core, SQL server, HTML (5), Javascript, CSS, Azure DevOps, Docker, GIT, Angular (7), ReactNative, EntityFramework

Freelance Software Developer, Fontem Ventures, Amsterdam Schiphol

September 2019 — January 2020

Worked on the Checkout Gateway, backend developer of the Checkout team. Part of the new e-commerce web-portal built to sell Vaporizers and E-cigarettes. Velocity, Datadog, Loqate, Kafka, Rider, Functional Programming with C#. Mobile first development.C# Backend Web API.

Worked with: C#, .NET Core, SQL Server, Azure Devops, Scrum, EntityFramework

Freelance Software Developer, Allshare, Amsterdam, Sloterdijk

October 2018 — April 2019

Working on eBankView. Doing maintenance on module CAM: Corporate-Actions-Module. Building the new TAX-module. (taxes) eBankView is the web based banking application for VanLanschot Bankers, build in C# Microsoft .NET Core.

Worked with: C#, .NET Core, SQL Server, HTML (5), Javascript, CSS, Azure Devops, Scrum, Angular (7), Docker, Entity Framework.

Freelance Software Developer, About: Blank, Zaandam

July 2018 — September 2018

Doing maintenance on the New York Pizza website and back office systems. C# .Net, MVC. Retrieving data from the VektisStream API for the Solvo.nl project.

Worked with: C#, .NET Core, SQL Server, HTML (5), Javascript, CSS, Azure Devops, Teamcity, SCRUM, Angular, LLBLGEN

Freelance Software Developer, KPMG, Amstelveen

September 2016 — April 2018

Doing maintenance on many different .NET applications for a large international accountancy

organization. Project: ACO = Automated Close-out. I built and delivered ACO 2.0 in 2017 and ACO 3.0 in 2018.

Worked with: C#, .NET, SQL Server, Javascript, CSS, Azure Devops, SCRUM, Angular, ASP.NET, IIS

Freelance Software Developer, Expereo, Amsterdam

August 2016 — August 2016

Working on BOSS version 5. BOSS is a platform developed in .NET that ties together all the nodes from ISP's all over the world.

Worked with: C#, .NET, SQL Server, Teamcity, SCRUM

Freelance Software Developer, Lobster, Amsterdam

February 2016 — May 2016

Back-end based on EF. Started code-first, then switched to database-first. Visual studio 2015 using resharper. MSSQL server 2014. Web-API using GraphQL (facebook). Frontend: Angular 2. Node.js using NPM as a frontend package manager. Web application is hosted in Azure, also using CDN for streaming video-content globally.

Worked with: C#, .NET CORE, SQL Server, HTML (5), Javascript, Typescript, CSS, AzureDevops, Teamcity, SCRUM, Angular

Software Developer, Reed Business (hired as consultant: Working Spirit), Amsterdam

February 2014 — November 2014

Working as Dev-ops @ ReedBusiness. Programming C# .NET. Nextens , Cumulus. Refactoring the Nextens solution. I had the pleasure to work with a professional team. Scrum master: Daan Fliervoet. Senior developer: Hanno Zwikstra. And one of the best guys I ever worked with: Bryan Sumter.

Worked with: C#, NET Core, SQL server, HTML, Javascript, CSS, Azure DevOps, SCRUM, Angular

Software Developer, Working Spirit ICT, Amsterdam

November 2013 — February 2016

Inhouse: Developing software with Microsoft .NET technology. Mobile development with Sencha: HTML5, Javascript, CSS. Working as a consultant, I worked on several projects for several clients.

Worked with: C#, .NET, SQL Server, HTML, Javascript, CSS, Azure Devops, SCRUM.

Freelance Software Developer, Truvo, Amsterdam

February 2013 — September 2013

Creating WCF services as a C# back-end developer in a service oriented architecture.

Worked with: C#, .NET, SQL Server, Javascript, CSS

Software Developer, ExpertVision, Haarlem

February 2011 — January 2013

Software developer working on our clients (tour operators) websites and our connected back office : DynaTravel.

Worked with: C#, .NET, SQL Server, HTML, Javascript, CSS, Azure Devops, ASP.NET
